

Cancer Research Institute (CRI) -

Immunotherapy

The Answer to Cancer

“Immunotherapy capitalizes on the innate power of the immune system to eliminate cancer, giving patients hope for a cure. By taking advantage of our immune system’s ability to remember cancer cells, there is the potential to offer patients permanent protection against cancer recurrence.”

Pretty powerful words to start a Webpage but they are part of the Worthy Grand Matron (WGM) and Worthy Grand Patron’s (WGP) Special Service Projects (SSP’s).

Impacting Every Day While Transforming Tomorrow

“Immunotherapy is here and is leading to highly effective cancer treatments for patients around the world. To that end, CRI offers valuable tools, support, and insights to hasten the advancement of immunotherapy research, propelling it forward to reach its greatest potential.”

As with most of the past WGM/WGP SSP’s the impact of these research and development institutions has a great effect on everyday People. Just like Your Sisters and Brothers!

DEFINITION OUTREACH-

the extending of services or assistance beyond current or usual limits.

There are times when, by no fault of the person, a helping hand is needed when all resources are exhausted.

This is the definition of Outreach for Eastern Star of California.

Outreach is often meant to fill in the gap in the services normally provided.

On our Webpage, we have ways to donate to the fund either online or through the mail.

Please notate the fund you wish to make payable.

Outreach and Cancer Research – Immunotherapy are part of the WGM/WGP Special Service Projects and are listed as such on the Website.

We are grateful to all members and Thank You for your generosity.

Christine Huff, WGM

Larry Orozco, WGP
