

Greetings California!

This month is dedicated to one of the special projects of the Worthy Grand Matron and Worthy Grand Patron: raising funds for Automated External Defibrillators (AEDs) to be installed in Masonic Centers where we meet. These devices can oftentimes mean the difference between life and death in emergency situations. We have a great number of members who are in the healthcare field, and they would all be willing, we're sure, to share with you how vital it is to have an AED readily available. To those who are saying to themselves "I don't even know how to use one!" we say not to worry, the contacts we have are working diligently with us to provide training on the use of these devices as well. Now, we understand that the actual use of one of these AEDs is something we never hope to have happened BUT, think of it like a spare tire in your car, wouldn't it be best to have one and not need it than to need one but not have it? We don't know about you, but we know our answer... For more information, be sure to visit the website and click on the "Our Charities" tab.
