

Patient Care: Built on Love

Since 1956, our members have supported cancer patients, evolving from making basic supplies like wound dressings, to the PortPals and other products we create today. This 70-year legacy relies entirely on hands-on care.

You can help by donating your time to stitch pillows, assemble comfort packages, or donate fabric and funds. If your local chapter is not currently active in the patient comfort program, you can easily get involved. Reach out to the chairman, Judy Parker, to find an active group near you. Let's keep building this bridge of comfort together.
